Long-living and robust for dependable mobility.  
KÖCO – SAFETY AND INNOVATION

## KÖCO STUD WELDING TECHNOLOGY FOR VEHICLE CONSTRUCTION

Here especially, when we talk about road & rail vehicle construction, we all speak about long service life and highest product safety. Whether threaded studs, high-tensile studs, welding machines or client-specific cold-formed parts – optimum dependability of the product is right in our focus. In our development & construction department, our engineers work together with you to find the right purpose-built item for your applications. Our pro-

ducts have to undergo the most stringent quality controls as well as documentation commitments and can trace back the origins of raw materials. This gives you the security of a safe guarantee. We are fully aware that short-term and reliable delivery is essential, and therefore guarantee you the necessary fabrication & delivery flexibility through high production capacity and wide-ranging raw material store.

Wheel bolts for construction machines

## KÖCO – APPLICATIONS FOR HIGH-TENSILE THREADED STUDS AND COLD FORMED PARTS

### KÖCO for vehicle construction

- Long-living and robust best-quality studs and stud welding machines
- Safe and precise maintenance of all technical specifications
- Special fabrications
- Tightest quality controls give the necessary safety
- Easy to operate and high efficiency of the stud welding machines
- User-related technical consultation for special fabrications

Wheel bolts for utility vehicles

Taped studs for truck chassis

Bus wheel bolts

Car knuckle joints

Bucket wear protection

Fixing bolts for sweepers

Threaded studs for truck chassis

Welding pin for snow mobiles

Threaded studs for harvester

Special screw for tractors

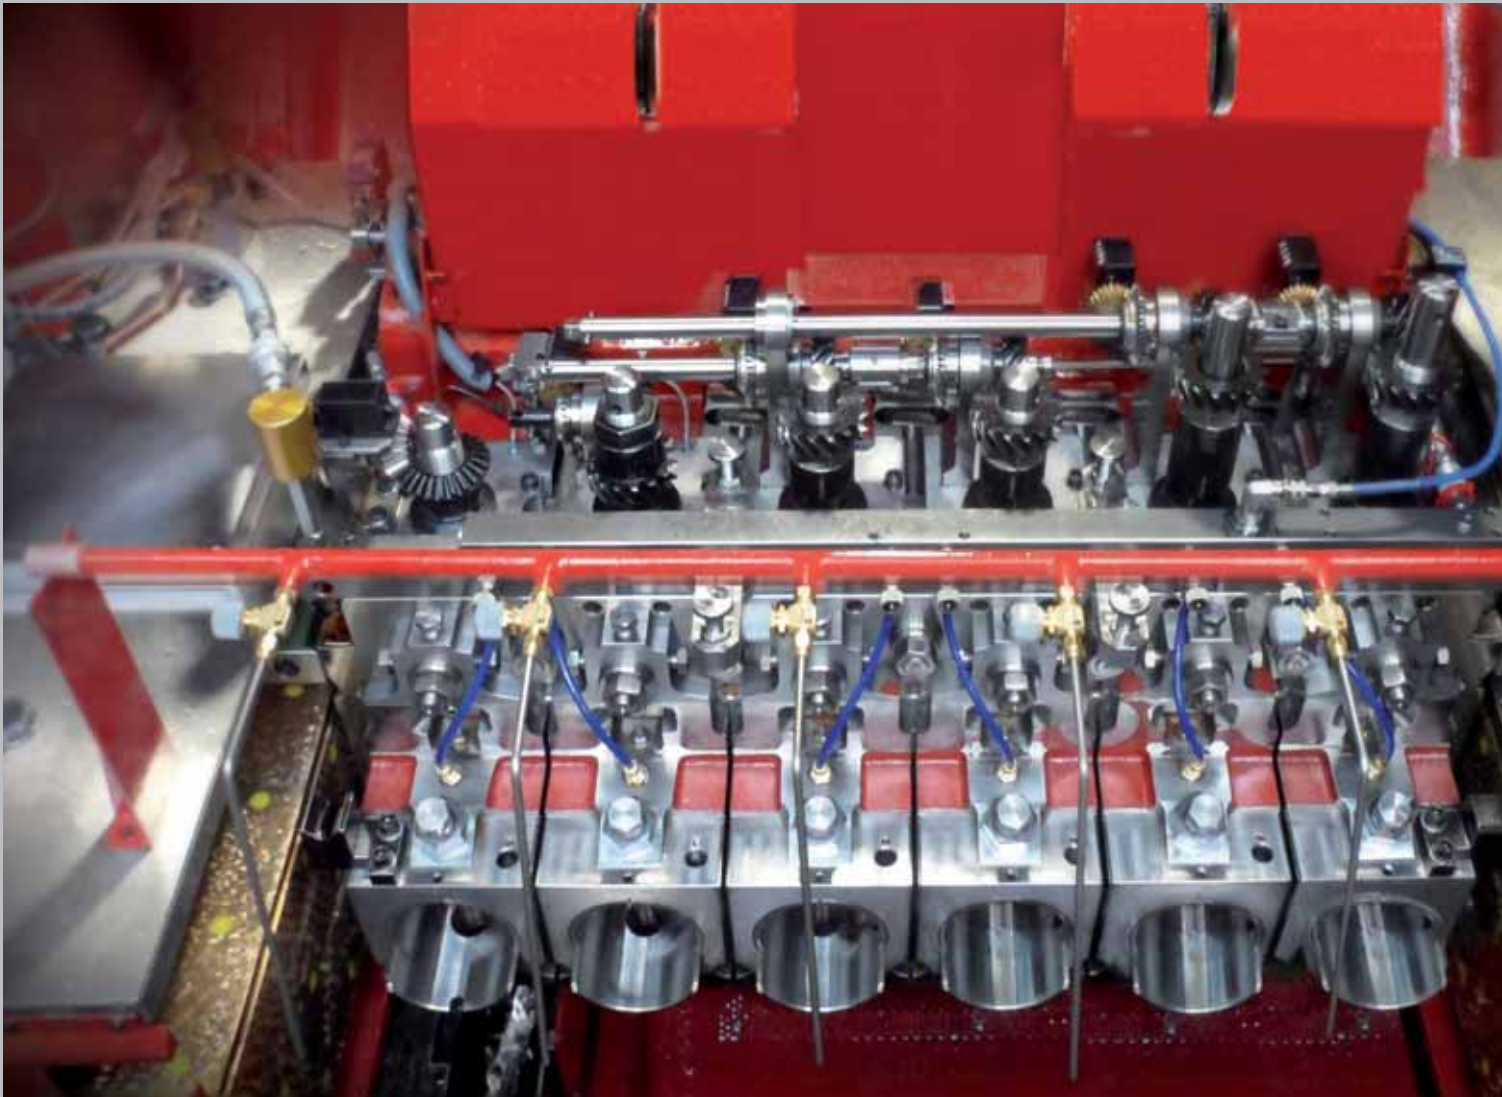

Welding studs for dampers

Welding pin for tuning dampers

Production of sophisticated parts on modern 6-station cold formers

## KÖCO – PRODUCTION TECHNOLOGY

### Products

- Cold-formed parts
- High-tensile studs
- Threaded studs
- Internally-threaded bushes
- Welding machines
- Consultation services
