Shear stud

SAFE AND ECONOMIC SOLUTIONS FOR YOU

Around the world KÖCO stands for safe and economic solutions in concrete bonding construction. As specialist in the field of studs and stud welding, for well over 60 years now we have been offering a wide spectrum of services for the steel, building & bridge construction industries.

We are well aware that dependability of our products is the decisive factor necessary in the safety of your project. We have made good use of experience over the past years and always guarantee the safe fulfilment of

all technical requirements through qualitative high-value and long-life studs as well as stud welding machines. Through our engineering-related technical know-how, we accompany you through the complete process, working along the way, to finally find suitable solutions. We have a large number of authorisations at our disposal and are certified according to international standards. Even country-related specifications and requirements in the field of special material, are taken into consideration and implemented.
