KÖCO – SAFETY AND INNOVATION | SHIP CONSTRUCTION

Flexibility and Reliability for Worldwide Guaranteed Availability in ship Construction.  
KÖCO - SAFETY AND INNOVATION

## KÖCO – STUD WELDING TECHNOLOGY FOR SHIP CONSTRUCTION

KÖCO stud welding technology stands for absolute dependability. As long-standing partner to the shipbuilding industry, the fulfilment of all technical specifications and standards is a basic priority and duty for us. We furnish a wide selection of threaded studs for you in a range of materials and material characteristics and also supply the correct stud welding

machines. You can be sure you are on the safe side with our products, because you get excellent quality for all fastening-related technical solutions and equipment for shipbuilding from KÖCO – fast & flexible manufacture and in full compliance with agreed delivery times. For products, which exactly fulfil your expectations.

High-strength welding elements or shipbuilding construction

## KÖCO – THREADED STUDS AND WELDING STUDS IN DEPLOYMENT

### **KÖCO for the shipbuilding industry**

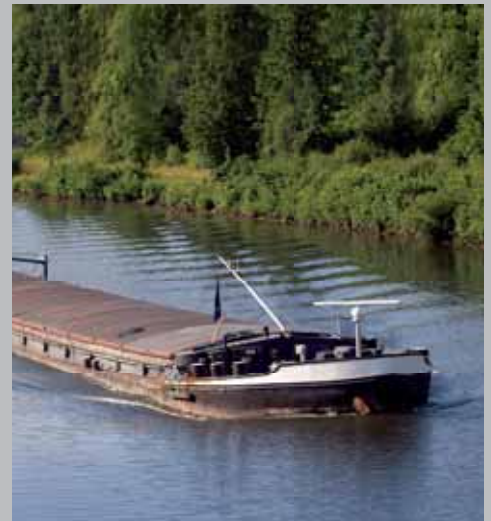

- Extensive range of threaded studs in various non-standard materials and steel grades
- Reliable stud welding units in robust design for heavy-duty steel & ship construction
- Technical specifications and standards in shipyard construction fulfilled at all times
- Application-related technical consultation and support on-site
- Highest flexibility in fabrication
- Fast and in-time delivery
- Sales and Service through Hilbig GmbH, ship construction specialist

Wear-protection for dragnets

Threaded studs for pipework fixation

Threaded studs in segment construction

Insulated studs for passenger ships

Threaded studs in non-magnetic steel

Shear connectors with internal threads in frigate construction

High-performing 230 Volt inverters for flexible assembly in shipbuilding

## KÖCO – WELDING ELEMENTS AND WELDING MACHINES

### Products

- Stud welding machines
- Threaded studs
- Consultancy services
- Welding services
- After-Sales-Service

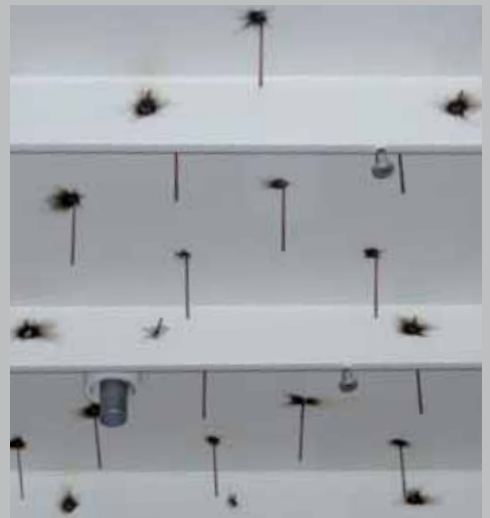

Mounted Hilbig straightening bridges

Welding elements for ceiling suspensions

High-tensile threaded studs for a manhole ring

Partly-mounted Aluminium straightening bridges
